

# IT MIGHT BE TODAY

## DON'T RFID MY KID

Every Sunday we present a prophecy update. We show how news and trends in the world corroborate centuries-old prophecies you read in the Bible.

Two-thousand years ago the apostle John wrote The Revelation of Jesus Christ while exiled on the Island of Patmos. Jesus showed John the future. Part of it was a technology of personal identification by which all the citizens on the earth would conduct their daily activities. John was shown that people would have something in or on their hand or forehead - he called it a "mark."

**We are the first generation in history that could see this technology implemented right now, today.**

It's being introduced through our kids. On March 26 yahooNews posted a story titled, *Microchipped school uniforms notify parents when kids skip school.*

Excerpts:

In Vitoria da Conquista, Brazil, 20,000 grade school students have recently started wearing uniforms embedded with GPS chips similar to those used in pet trackers. The chips automatically send parents a text message as soon as their children enter the school grounds, or if their children are late for more than 20 minutes.

The microchip is embedded either under the school's coat of arms or in one of the sleeves. According to the city's education secretary Coriolano Moraes, the local government decided to launch the project because parents "would always be surprised when told of the number times their children skipped class."

Vitoria da Conquista's government has spent \$670,000 designing and manufacturing shirts for the first 20,000 students. City officials plan to make more so that all 43,000 public school students in the city from ages 4 to 14 can use the high-tech shirts in 2013.

On October 9 USAToday posted a story titled, *Texas Schools Punish Students Who Refuse to be Tracked with Microchips*.

Excerpts:

A school district in Texas came under fire earlier this year when it announced that it would require students to wear microchip-embedded ID cards at all times. Now, students who refuse to be monitored say they are feeling the repercussions.

Since October 1, students at John Jay High School and Anson Jones Middle School in San Antonio, Texas, have been asked to attend class with photo ID cards equipped with radio-frequency identification (RFID) chips to track every pupil's location.

Educators insist that the endeavor is being rolled out in Texas to stem the rampant truancy devastating the school's funding. If the program is judged successful, the RFID chips could soon come to 112 schools in all and affect nearly 100,000 students.

Students who refuse to walk the school halls with the card in their pocket or around their neck claim they are being tormented by instructors, and are barred from participating in certain school functions. Some also said they were turned away from common areas like cafeterias and libraries.

Whoopi Goldberg, on air on *The View* on April 23, suggested that in light of the horrible things that can happen, we should consider implanting microchips into children at birth, much like we do for our pets.

What's next? What has always been next is the resurrection and rapture of the church. It will happen prior to any part of the seven-year Great Tribulation that is coming upon all the earth.

Are you ready for the rapture? If not, get ready, stay ready, and keep looking up. ***Ready or not, Jesus is coming!***
