

IT MIGHT BE TODAY

"Noah News is Good News"

If these are the last days, and if Bible prophecy is to be taken literally, then we ought to be able to look at the news and the trends in the world and see corroboration of the prophecies that are still awaiting fulfillment.

The apostle Peter, writing about the last days, had a lot to say about Noah and the global flood. Jesus singled-out the days of Noah as a referent to things that would be occurring in the last days.

You'd expect, therefore, that Noah and the global flood would be making news... And that's exactly what you find happening.

First, let's mention the Hollywood movie that's going to be released starring Russell Crowe as Noah. You might want to temper your excitement about it being biblical. A recent article published by The Christian Post was titled, *'Noah' Blockbuster 'Least Biblical Biblical Film Ever Made,' Director Says*.

Excerpts:

"Noah" Director Darren Aronofsky has declared that his forthcoming Bible-themed flick is the opposite of biblical.

"Noah is the least biblical biblical film ever made," Aronofsky is quoted as saying.

Aronofsky reportedly planned to introduce the themes of evolution and global warming into the story of the biblical patriarch.

"This is not some attempt to tell the Bible story - they want to make it into an Action/Adventure," Dan Gainor, vice president of Business and Culture for The Media Research Center, told CP earlier. "It's laughable what's in the trailers."

A Hollywood movie about Noah doesn't exactly fulfill prophecy - although it is interesting to note. In other news, someone forwarded to me an article from USA Today titled, *'Hell Diamond' signals vast, deep water deposit.*

Excerpts:

A huge "wet zone" hundreds of miles beneath the surface of the Earth could hold as much water as all the oceans put together, according to researchers analyzing a mineral from deep in the mantle. The water... is held inside minerals in the "transition zone" 250 to 400 miles underground.

Evidence of the vast reservoir was provided by a water-rich sample of ringwoodite, a mineral that exists deep inside the mantle but has only ever before been seen in samples created in labs or extracted from meteorites. It was found in a battered diamond dug up by miners in Brazil. "It's a fairly ugly diamond. It looks like it's been to hell and back," the lead researcher said. The diamond was brought to the surface from hundreds of miles underground by a violent volcanic eruption researchers say was "analogous to dropping a Mentos mint into a bottle of soda."

<http://www.usatoday.com/story/tech/2014/03/13/hell-diamond-signals-vast-deep-water-deposit/6366699/>

The scientists have several theories, but they don't know how all that water got there. People sometimes ask about the global flood in Genesis and want to know where all the water went.

It seems maybe now we know?

You'd expect Noah and the flood to be in the news, and they are.

We trust the prophecies and the promises of God. One of those is that Jesus will return imminently to resurrect the dead believers of the church age, and that when He does He will also rapture living believers off of the earth. We will be changed in a moment, in the twinkling of an eye, and be transported to Heaven.

Are you ready for the rapture? If not, get ready, stay ready, and keep looking up. ***Ready or not, Jesus is coming!***
