

IT MIGHT BE TODAY

EES

Every Sunday we present a prophecy update. We show how news and trends in the world corroborate centuries-old prophecies you read in the Bible.

By far the most well-known and at once terrifying prophecy is the mark of the beast. It's something on your hand or forehead that will identify you and that will allow you to transact all of your business in a cashless society. It is a system that will already be in place when the world leader we know best as the antichrist demands all the world swear its allegiance to him. If you don't, you won't be able to buy or sell anything and you will be hunted down and killed.

As far as the technology is concerned, we are already there. There are multiple technologies that could be implemented tomorrow giving us the ability to be identified and to transact business electronically.

For example. [DVCNews.com](http://dvcnews.com)¹ posted a story on August 9 titled, *RFID Install at Contemporary Resort*. (The Contemporary Resort is the name of one of the hotels at DisneyWorld in Orlando).

Excerpts:

Disney's Contemporary Resort is ground zero for Walt Disney World's installation of Radio Frequency Identification (RFID) technology property-wide.

¹ <http://dvcnews.com/index.php/resorts/bay-lake-tower/news/2028-rfid-install-at-contemporary-resort>

Numerous RFID solutions have been installed throughout the Contemporary... as Disney begins to roll-out this new technology.

The most visible change to guests are the RFID room keys which allow guests to simply tap their Key To The World card on an RFID receiver panel to unlock the door.

Sure, it's just something on your room key for now. **It could just as easily be on your skin.**

One year ago numerous news outlets reported on an advance called EES - Epidermal Electronic Systems. One article stated,

A team of engineers today announced a discovery that could change the world of electronics forever. Called an "epidermal electronic system" (EES), it's basically an electronic circuit **mounted on your skin**, designed to stretch, flex, and twist - and to take input from the movements of your body.²

The pictures in the article are creepy. One shows the circuit applied to your hand. Even nonbelievers get the creeps from it.

One of the project leaders was quoted as saying, "I envision endless applications that extend beyond biomedical applications."

These are the last days and things are lining up just as God said they would!

Does anything need to happen before Jesus returns to resurrect and rapture the church? No. And that's why I like to end these updates by saying, Get ready, stay ready, keep looking up.

Ready or not, Jesus is coming!
