

# IT MIGHT BE TODAY

## In the Palm of Your Hand

Every Sunday we present a prophecy update. We show how news and trends in the world corroborate centuries-old prophecies you read in the Bible.

Two-thousand years ago the apostle John wrote The Revelation of Jesus Christ while exiled on the Island of Patmos. Jesus showed John the future. Part of it was a technology of personal identification by which all the citizens on the earth would conduct their daily activities. John was shown that people would have something in or on their hand or forehead - he called it a "mark."

**We are the first generation in history that could see this technology implemented right now, today.**

On October 2nd Laptop Magazine posted a story on their website titled, *Your Next Smartphone Could Use Palm Print Authentication*.

Excerpts:

Japanese telco KDDI... has been showing off a demo app that authenticates identity by taking a high resolution picture of your palm.

<http://blog.laptopmag.com/your-next-smartphone-could-use-palm-print-authentication>

Apple purchased AuthenTech, an American finger-print scanning firm. The head of an Australian biometrics company which scored a key contract with Apple says the future of mobile technology will

be closely linked with fingerprint scanning and other ID tech, especially as phones and payment systems become entwined.

The article I read stated, "the revelation that Australian firm Microlatch has been working with Apple on a contract for the past year is yet another sign the tech giant is becoming serious about identification technology..."

<http://www.smartcompany.com.au/information-technology/052149-meet-the-australian-biometrics-company-working-with-apple-on-id-technology.html>

These advances combine biometric scanning and payment technology. Your smartphone will be your wallet and you will access it using your palm print, or as we might say, the "mark in your hand."

Meanwhile over in the UK "the Government will announce details this month of a controversial national identity scheme which will allow people to use their mobile phones and social media profiles as official identification documents for accessing public services." The article I read went on to say,

Ministers are anxious that the identity program is not denounced as a "Big Brother" national ID card by the back door, which is why data will not be kept centrally by any government department. Indeed, it is hoped the Identity Assurance Program, which is being led by the Cabinet Office, will mean the end to any prospect of a physical national ID card being introduced in the UK.

The table is being set for the end times events prophesied many centuries ago in the Bible. Israel is back in her land, surrounded by enemies and causing perplexities for all the nations of the world. There is a call for a one-world government - a serious call.

The European Union is emerging more-and-more as the revived Roman Empire. The explosion of the occult and UFO's is setting people up for a great spiritual deception.

What's next? What has always been next is the resurrection and rapture of the church. It will happen prior to any part of the seven-year Great Tribulation that is coming upon all the earth.

Are you ready for the rapture? If not, get ready, stay ready, and keep looking up. ***Ready or not, Jesus is coming!***
