

# IT MIGHT BE TODAY

## Gotta Hand it to Him

We like most Sunday's to bring what we call a Prophecy Update. We show how news and trends in the world are corroborating centuries-old prophecies found in the Bible.

Ours is the generation that can fully appreciate the prophecy of the mark of the beast.

While exiled for his faith in Jesus on the island of Patmos, the aging apostle John received the Revelation of Jesus Christ. In it he was told of a time when the people in the world would conduct all their business by some sort of personal identifier in or on their hand or forehead.

Just in the last several years various technologies have been not just developed but introduced that could be said to fulfill part of this terrifying prophecy.

An article was posted on [thetechjournal.com](http://thetechjournal.com) titled, *MIT Students Design Sesame Ring to Resolve Transit Issues*.

Excerpts:

The problem with students taking public transportation from one place to another is that they may often end up losing their transit card. And even if they don't lose it, it frequently becomes misplaced. Two MIT students have resolved this issue by designing a new 'Sesame ring.'

Sesame ring is a 3D-printed ring which comes equipped with RFID support and is water-proof. All a user needs to do is load the ring with money whenever it runs out, and put it against the scanner on the turnstile. The scanner will instantly read the information off the ring, deduct the defined sum of money and let you go to the train within seconds.

Another article posted on [business.times.com](http://business.times.com) was titled, *Silterra chips at World Cup & Olympics?*

Excerpts:

SILTERRA... radio frequency identification (RFID) chips are likely to be used to tag items at the 2014 World Cup and 2016 Olympic Games in Brazil.

"Silterra's RFID chips will most likely be used in items such as identity tags and scanners for the World Cup and Olympic Games by a home-grown Brazilian firm, which has been qualifying its technology on our processes for a working chip for the last two years," said [their] chief executive officer.

Then there was this, from [dailymail.uk.com](http://dailymail.uk.com). The article asked, *Would you have tattoo IMPLANTED under your skin? Artist has chip placed inside his hand that reveals artwork when read by a smartphone.*

Excerpts:

In the name of art, New Yorker, Anthony Antonellis has undergone a gruesome procedure to implant a 'digital tattoo' in his hand. Other than a scar, you can't see his tattoo. But hold a smartphone against the incision, and Mr Antonellis' latest masterpiece is revealed.

The effect is produced using a radio frequency identification (RFID) chip, around the size of a grain of rice, and equipped with a tiny antenna.

The implant can be read from a distance of about 1 to 2 cm and artwork can be added to the chip by sending data through a smartphone.

Since the chip is a passive device it doesn't require a battery, but is instead powered by the magnetic field generated from the reader.

The future John saw is now possible. Bible prophecy is coming true - or at least the potential for it to come true exists for the first time in history.

I always remind you that technology is not the mark of the beast. The 'mark' involves swearing allegiance to the world leader we call the antichrist. No one will inadvertently take his 'mark' by simply having a chip placed under their skin. It's a conscious, willful decision to reject Jesus Christ in favor of antichrist.

We won't be on the earth when the antichrist makes his demand. We will have been raptured.

Are you ready for the rapture? If not, get ready, stay ready, and keep looking up. ***Ready or not, Jesus is coming!***
