

IT MIGHT BE TODAY

"DHS & DNA"

We like most Sunday's to bring what we call a Prophecy Update. We show how news and trends in the world are corroborating centuries-old prophecies found in the Bible.

In the last book of the Bible, in The Revelation of Jesus Christ, the apostle John was given a series of visions about the future just prior to and including the Great Tribulation.

Among the things he saw were a movement toward a global government and a global economic system by which everyone would be on the grid and conduct all their daily business by virtue of some personal identifier on them or in them.

As to a global government, sources are reporting disturbing things about a trade agreement the United States is negotiating, called the Trans-Pacific Partnership.

Here are a few excerpts from an article critical of the agreement:

This treaty has 29 chapters, but only 5 of them have to do with trade. Most Americans don't realize this, but this treaty will fundamentally change our laws regarding Internet freedom, health care, the trading of derivatives, copyright issues, food safety, environmental standards, civil liberties and so much more. It will also merge the United States far more deeply into the emerging one world economic system. Initially, twelve nations will be a party to this treaty including the United States, Mexico, Canada,

Japan, Australia, Brunei, Chile, Malaysia, New Zealand, Peru, Singapore and Vietnam. Together, those nations represent approximately 40 percent of global GDP. It is hoped that additional nations such as the Philippines, Thailand and Colombia will join the treaty later on.

Critics say, "This agreement will impose very strict Internet copyright rules on the American people, it will ban all "Buy American" laws, it will give Wall Street banks much more freedom to trade risky derivatives and it will force even more domestic manufacturing offshore."

Meanwhile the effort to have a database that will include every person and force us to have a unique personal identifier to conduct all our business got a boost from the Department of Homeland Security. On November 13 Michael Snyder posted an article titled, *The Government Plans To Track Us And Those We Are Related To Using Our DNA*.

Excerpts:

The Department of Homeland Security is soliciting information from potential contractors for a new program that the DHS hopes will enable it to use DNA tests to identify criminal suspects and track their family relationships. Down the road, the goal is to make the use of DNA identification as common as the use of fingerprint identification is today.

If you do not think that this could ever happen, you should think again. Barack Obama has already said that he wants a national DNA database, and a recent Supreme Court decision has opened the door wide open for one to be created. Someday soon, the federal government will have the capability of tracking all of us and those that we are related to using our DNA. And eventually, a “DNA reader” could replace all of our Internet passwords and be used to log into our bank accounts.

Christians who take the Bible seriously and understand prophecy is going to be fulfilled literally have predicted these advances for many years. It's only a matter of time before the global government and global economics John foresaw are a reality.

I'm not sure how much of all that we will experience. I do know we won't be here for any of the seven year Great Tribulation.

The one event that we are anticipating, that could happen at any moment, is the return of Jesus Christ to resurrect the dead in Christ and to rapture living believers.

Are you ready for the rapture? If not, get ready, stay ready, and keep looking up. **Ready or not, Jesus is coming!**
