

# IT MIGHT BE TODAY

*"The G"*

## **Prophecy Update #756**

The Bible is estimated to be 25%-35% prophecy. It's very specific prophecies have thus far been 100% accurate.

There is much Bible prophecy that is yet unfulfilled. For example, beginning in chapter six, everything in the Book of the Revelation of Jesus Christ is future to us. That is why we are called futurists. We believe that these yet-to-be-fulfilled prophecies will be fulfilled in a physical, literal, global, apocalyptic context.

It makes sense that the world would be moving in the direction that the prophecies predict. Biometrics, Artificial Intelligence, cashless commerce, the manipulation of human DNA, global government, the exponential growth of human knowledge, and the rebirth of national Israel are potential End Times phenomena the Bible predicts. All of these are increasingly trending in the news.

I always give two disclaimers:

1. We are careful to use recognized, reliable sources for news. Sensationalism about the future is detrimental.
2. We're not saying the things we report are the fulfillment of prophecy. We're saying that they are the things you'd expect to be happening in the build-up to the future Great Tribulation.

Two-thousand years ago the Bible predicted that there will be a global, totalitarian government. The global economy will be cashless, accessed by a personal identifier involving the hand or forehead. At the mid-point of the 7yr Great Tribulation, the leader we know as the antichrist will demand that everyone acknowledge that he is 'God.' Those who refuse will be unable to participate in the system of commerce and government. They will, in fact, be hunted and killed.

**All of those predictions seem to be converging.**

The G20, or "Group of 20," is an intergovernmental forum comprising 19 sovereign countries, the European Union (EU), and the African Union (AU). It works to address

major issues related to the global economy, such as international financial and climate change.

A recent article was titled, *G20 Announces Plan to Impose Digital Currencies and IDs Worldwide*.

Excerpts:

*The leaders of the Group of 20 nations have agreed to a plan to eventually **impose** digital currencies and digital IDs on their respective populations, amid concern that governments might use them to monitor their people's spending and **crush dissent**. The G20, which is made up of the world's leading rich and developing nations and is currently under India's presidency, adopted a final declaration on the subject over the weekend in New Delhi.*

*The group announced last week that they had agreed to build the necessary infrastructure to implement digital currencies and IDs. The European Union is currently trying to introduce a bloc-wide "digital identity" app that would consolidate various personal information, including passports, driver's licenses, and medical history.<sup>1</sup>*

In the first sentence the reporter said there is "a plan to eventually impose" this on everyone. A forced system of global commerce and citizenship is *exactly* what is predicted in the Bible.

The British are imposing climate change mandates upon its citizens. If you have been to London recently you saw signs for Ulez. It stands for "Ultra low emissions zone." The authorities publish a list of vehicles that meet the emissions and safety standards required to drive in London. If your car does not, you must pay a little over \$15.00 *per day*. To monitor the new zone, Transport for London (TfL) said it would install 2,750 cameras across outer London. As of mid-August, 1,900 cameras had been placed, almost 70% of the total number planned.<sup>2</sup>

President Biden said he plans to request additional funding from Congress for the development of a new COVID19 vaccine, **adding he may require everyone to take it whether they previously received a vaccine or not.**

<sup>2</sup> <https://www.bbc.com/news/uk-england-london-66592199>

The Intergovernmental Panel on Climate Change (IPCC) has determined that we have fewer than 10 years to reduce global emissions by half to avoid the worst impacts of catastrophic climate change. To tackle this urgent need, they say we must align food policy with climate policy and drastically reduce the amount of meat and dairy produced. This is especially true for countries with high consumption, like the United States. Cutting 90% of beef consumption and replacing 50% of other animal-based foods with plant-based foods in the United States would save more than 2 billion tons of greenhouse gas emissions from being released into our atmosphere by 2030.<sup>3</sup>

### **We are rushing headlong into the tyrannical one-world that is predicted in the Bible**

If polls are correct, most of the people in the world favor it. How much more of this trend will we see? That is impossible to predict.

What we do know is this: in His incarnation, Jesus proclaimed that the kingdom promised Israel had come. When the Jewish leadership rejected Jesus as their King, Jesus went to Heaven. The physical kingdom on earth went on standby.

We live in the Church Age. It began on the day of Pentecost after Jesus Christ rose from the dead. It precedes the Time of Jacob's Trouble, more commonly known as the seven-year Great Tribulation.

The Tribulation will not begin until something fantastic happens. The Lord said He would return for us, the Church, raising the dead in Christ, then catching up, rapturing, believers who are alive when He comes. He promised His Church Age believers, "I also will keep you from the hour of trial which shall come upon the whole world, to test those who dwell on the earth" (Rev 3:10).

The resurrection and rapture of the church is always imminent. It could happen any moment; nothing needs to happen before it.

Are you ready for the rapture? If not, Get ready; Stay ready; Keep looking up.

***Ready or not, Jesus is coming!***
