It Might Be Today

"@textwithJesus"
Prophecy Update #793

You can text with Jesus.

The developers say, "Discover a new, interactive way to engage with your faith through *Text With Jesus,* a revolutionary AI-powered chatbot app, designed for devoted Christians seeking a deeper connection with the Bible's most iconic figures.

The app is pre-loaded with a wide range of biblical figures, including the Holy Family, the Apostles, and more. We're constantly adding new figures, so stay tuned!

Two of the FAQ's:

1. **Am I really talking to Jesus? Isn't this blasphemous?** Our app is a tool for exploration, education, and engagement with biblical narratives, and it is not intended to replace or mimic direct communication with divine entities, which is a deeply personal aspect of one's faith. The AI-powered app does not claim to provide actual divine insights or possess any form of divine consciousness, but simply uses its language model to generate responses based on a wide corpus of biblical and religious texts. The purpose of the app is to stimulate reflection, deepen understanding of religious texts, and encourage meaningful conversations about faith.
2. **Can I really chat with Satan?** Satan is included in the app to provide a comprehensive understanding of biblical narratives, reflecting the character's role as described in the Bible. However, interaction with Satan is turned off by default and must be manually enabled by the user if they choose to engage with this figure. The portrayal is rooted in Christian teachings, and users have full control over their engagement with all figures within the app.

Anthony Levandowski is an AI pioneer. He launched an AI religion, called Way of the Future. "For the last 4 billion years we've had organic lifeforms, [but] now, for the first time things are changing and we're going to have inorganic life forms," Levandowski told Bloomberg. "We don't know what [these inorganic life forms] are going to be, [but] we're going to fuse it with all these magical powers, and we want it to give us things."

Levandowski believes that AI can bring "Heaven on Earth." He says, "Here, we're actually creating things they can see, be everywhere and maybe help us and guide us in a way normally you would call God."

BTW This is idolatry; be aware & beware.

In our Weekly Updates, we have connected AI with what is called in the Revelation, the Image of the Beast. It is something inanimate that is given "breath" so "that the Image of the Beast should both speak and cause as many as would not worship the Image of the Beast to be killed." It might be what defiles the Tribulation Temple. It's easy to see how most of the global population will go along with it.

Especially if they are already texting religious characters that seem alive thanks to AI.

Is AI the thing that will power the Image? We're not saying that - only that it certainly could.

We live in the Church Age. It began on the day of Pentecost fifty days after Jesus Christ rose from the dead. It precedes the Time of Jacob's Trouble, more commonly known as the seven-year Great Tribulation.

The Tribulation will not begin until something fantastic happens. The Lord said He would return for us, the Church, raising the dead in Christ, then catching up (rapturing) believers who are alive when He comes. He promised His Church Age believers, "I also will keep you from the hour of trial which shall come upon the whole world, to test those who dwell on the earth" (Revelation 3:10).

The resurrection and rapture of the church is always imminent. It could happen any moment; nothing needs to happen before it.

Are you ready for the rapture? If not, Get ready; Stay ready; Keep looking up.

Ready or not, Jesus is coming!
