

# IT MIGHT BE TODAY

## ***"Image Is Everything"*** ***Prophecy Update #809***

We set aside a few minutes most Sunday mornings to identify connections between unfulfilled Bible prophecies and current news & events.

There are maybe 500 prophecies that are unfulfilled. For example, from chapter four forward, all of the Book of the Revelation is future, except for the few closing exhortations in chapter twenty-two.

Artificial Intelligence, AI, has been an absolute game changer when it comes to how certain fantastic prophecies might find fulfillment. We've talked a lot about it. Why not ask AI to elaborate?

I asked ChatGPT, *Could AI Fulfill the "Image of the Beast" Prophecy in Revelation 13?*

The prophecy in Revelation 13 describes the False Prophet creating an "image of the Beast" that is given breath to speak and cause those who refuse to worship it to be killed. This has led to speculation about whether artificial intelligence (AI) could play a role in fulfilling this end-times prophecy. Here's how AI might fit into this scenario:

1. **Lifelike Simulations:** Advanced AI-powered robotics and holograms are now capable of mimicking human behavior and speech with stunning realism. Some theologians have noted that such technologies could represent a literal "image" that appears alive - seemingly animating what is otherwise lifeless.
2. **Global Reach and Control:** AI systems already underpin global communication and surveillance networks, enabling centralized control. This could theoretically allow a single figure or system, such as the Antichrist, to project their influence worldwide through an AI-driven "image."
3. **Enforcement of Worship:** The prophecy also mentions that the image would enforce worship of the Beast. AI tools like facial recognition, behavioral analytics, and biometric systems could hypothetically monitor compliance, punishing dissenters - a chilling parallel to Revelation 13:15-17.

While these scenarios remain speculative, they highlight how rapidly evolving technologies might intersect with biblical prophecy. Whether AI will truly play such a role in the End Times remains to be seen, but its potential to deceive, control, and centralize power continues to provoke thoughtful discussion in both theological and ethical spheres.

Then I asked ChatGPT to write an antichrist joke. What is the antichrist's favorite font? Times New Roman.

Jesus promised to resurrect & rapture His Church *prior to* His Second Coming, and *before* the Great Tribulation would come upon the whole Earth.<sup>1</sup>

We will not see the revealing of the Antichrist.

The resurrection and rapture of the church is presented as an imminent event. It could happen anytime. Right now, for example.

Are you ready for the rapture? If not, get ready, stay ready, and keep looking up.

***Ready or not Jesus is coming!***
