

IT MIGHT BE TODAY

"All The News That's Fit To Predict"

Prophecy Update #830

Sometimes the news is so much like what the Bible predicts, it sound made up.

Story #1 - New digital ID scheme to be rolled out across UK

Excerpts: A new digital ID scheme will help combat illegal working while making it easier for the vast majority of people to use vital government services. Digital ID will be mandatory for Right to Work checks by the end of the Parliament.

The roll-out will in time make it simpler to apply for services like driving licenses, childcare and welfare, while streamlining access to tax records. The new digital ID will be held on people's phones, just as millions already use the NHS App or contactless mobile payments. There will be no requirement for individuals to carry their ID or be asked to produce it - but digital ID will be mandatory as a means of proving your Right to Work.

Believers and unbelievers are aware of what we call the Mark or the Beast. It will be something biometric identifier unique to each individual. It seems that the tech will be in-service before the AntiChrist comes to power. He will demand citizens swear allegiance to him or be cut-off from all purchases and benefits.

All advancements in this kind of tech remind us what is coming.

Story #2 - AI Now Claiming to Be God

Excerpts: A slew of religious smartphone apps are allowing untold millions of users to confess to AI chatbots, some of which claim to be channeling God himself.

As the *New York Times* reports, Apple's App Store is teeming with Christian chatbot apps. One "prayer app," called Bible Chat, claims to be the number one faith app in the world, boasting over 25 million users.

"Our AI was trained exclusively on Scripture and developed with guidance from Christian pastors and theologians," the company's website boasts.

"Greetings, my child," a service called ChatWithGod.ai told one user, as quoted by the *NYT*. "The future is in God's merciful hands. Do you trust in His divine plan?"

Religious leaders told the *NYT* that these tools could serve as a critical entry point for those looking to find God. It shouldn't be something where it replaces human connection," prayer app Hallow founder Alex Jones told the *NYT*. "It does not have a soul from the church's perspective."

In short, it's a dystopian new spin on spirituality in the digital age - and one that just might be poised to change the face of religion itself.

The AntiChrist will claim to be God. He will also have a statue made that seems to be sentient. Maybe AI.

I can't say how much we will see. We will be resurrected or raptured before the Great Tribulation.

Are you ready for the rapture? If not, get ready, stay ready, keep looking up.

Ready or not, Jesus is coming!
