

Prophecy Update #831 "Skin In The Game"

Jesus said "As the days of Noah were, so also will the coming of the Son of Man be. For as in the days before the flood, they were eating and drinking, marrying and giving in marriage, until the day that Noah entered the ark..." (Matthew 24:37-38).

If you have read Genesis, you know that Jesus was describing the type of "marrying" that was taking place before the flood. In chapter six we read, "Now it came to pass, when men began to multiply on the face of the earth, and daughters were born to them, that the sons of God saw the daughters of men, that they were beautiful; and they took wives for themselves of all whom they chose...There were giants on the earth in those days, and also afterward, when the sons of God came in to the daughters of men and they bore children to them" (6:1-4).

- The "sons of God" in this passage are fallen angels - 200 of them - who came to Earth.
- The "daughters" were human women.
- Their offspring were "giants."

They weren't just tall men. These are what we call Nephilim. All ancient rabbi's & all church fathers up to about AD 300 taught the sons of God were angels and the daughters were human women.

According to the Dead Sea Scrolls, "Fallen angels procreated the first Nephilim, leading the way to genetic tampering."

What scholars call *The 2nd Book of Enoch* describes the genetic tampering that produced Nephilim, both before & again after the global flood. When Jesus said the End Times would be as the Days of Noah, one thing He was getting at is genetic tampering with the human race.

We would therefore expect to see genetic tampering. Do we? Yes.

bbc.com, September 30, 2025, *Scientists make embryos from human skin DNA for first time.*

Excerpts:

US scientists have, for the first time, made early-stage human embryos by manipulating DNA taken from people's skin cells and then fertilising it with sperm.

The technique could overcome infertility due to old age or disease, by using almost any cell in the body as the starting point for life.

It could even allow same-sex couples to have a genetically related child.

Reproduction used to be a simple story of man's sperm meets woman's egg. They fuse to make an embryo, and nine months later a baby is born. Now scientists are changing the rules. This latest experiment starts with human skin.

The Oregon Health and Science University research team's technique takes the nucleus - which houses a copy of the entire genetic code needed to build the body - out of a skin cell. This is then placed inside a donor egg that has been stripped of its genetic instructions.

The study, published in the journal Nature Communications, showed 82 functional eggs were made. These were fertilised with sperm and some progressed onto the early stages of embryos development. None were developed beyond the six-day-stage.

"We achieved something that was thought to be impossible," said Prof Shoukhrat Mitalipov, the director of the Oregon Health and Science University's center for embryonic cell and gene therapy.

That opens the door to same-sex couples having children that are genetically related to both partners. For example, in a male same-sex couple, one man's skin could be used to make the egg and a male partner's sperm used to fertilize it.

Jesus predicted there would be genetic tampering of an egregious type. We expect it. We see it.

Jesus promised to resurrect & rapture His Church. He said, in fact He promised, He would do it before a time of Great Tribulation would come upon the whole Earth.

The resurrection and rapture of the church is presented as an imminent event. It could happen anytime. Right now, for example.

Are you ready for the rapture? If not, get ready, stay ready, and keep looking up.

Ready or not Jesus is coming!
